Important Information

Please refer to Troy's Glossary of Investment terms [here](#). Performance data relating to the NAV is calculated net of fees with income reinvested unless stated otherwise. Past performance is not a guide to future performance. Overseas investments may be affected by movements in currency exchange rates. The value of an investment and any income from it may fall as well as rise and investors may get back less than they invested. The historic yield reflects distributions declared over the past twelve months as a percentage of the Trust's price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Tax legislation and the levels of relief from taxation can change at any time. The yield is not guaranteed and will fluctuate. There is no guarantee that the objective of the investments will be met. Shares in an Investment Trust are listed on the London Stock Exchange and their price is affected by supply and demand. This means that the share price may be different from the NAV. Information on the risks of an investment in the fund can be found in the Prospectus.
